BESANA
CARPET LAB

Il tappeto è un elemento di narrazione visiva che esprime attraverso la sua matericità e sensorialità il carattere di un ambiente. Diventato negli anni sempre più anticonvenzionale, il tappeto viene considerato un vero e proprio elemento progettuale dalla grande forza espressiva.
/Rug drives narrative and expresses the character of an environment through its materiality and sensoriality. Over the years it has become more and more unconventional and today, it is considered a design element with great expressive power.

Lab

Storia

Da oltre quarant'anni Besana, attraverso ricerca e innovazione, realizza prodotti tessili provenienti da materie prime di alta qualità e nel rispetto dell'ambiente.

Fondata nel 1987 da Roberto Besana fino al 1990 questa azienda tessile è parte della celebre e prestigiosa Associazione dell'Industria Laniera Italiana.

Il punto focale dell'impresa brianzola è chiaro sin da subito a Roberto Besana e Paola Crippa: sviluppare un concetto di moquette innovativo, grazie a un'attitudine peculiare a una grande attività di ricerca su tecniche di filatura e di materiali e ponendo una particolare attenzione al rapporto con il cliente. Nel 2007 Besana Moquette trasferisce il suo "know how" anche nella realizzazione di tappeti, producendo progetti ad hoc e ampliando la sua selezione di pavimenti tessili permanenti ai tappeti in lana. Nasce così il brand Besana Carpet Lab: un vero e proprio laboratorio dove architetti, designer e clienti privati possono sperimentare e creare accostamenti inediti di colore per decorare e disegnare spazi pubblici e abitazioni private. È proprio in questa grande capacità camaleontica, di rispondere a ogni esigenza, che risiede l'unicità di Besana.

La possibilità di creare disegni e palette su misura consente a chiunque di realizzare pregiate moquette tailor made, anche grazie a una piattaforma online pensata dal team Besana per facilitare il dialogo tra utenti, professionisti e maestranze che lavorano tessiture e intarsi a mano. Un configuratore "open", accessibile a chiunque, studiato per garantire prodotti interamente personalizzabili e di alta qualità.

History

For over forty years Besana, through research and innovation, has been making textile products from high quality raw materials that respect the environment.

Founded in 1987 by Roberto Besana until 1990 this textile company is part of the famous and prestigious Italian Wool Industry Association. The focal point of the Brianza-based company was clear right from the start to Roberto Besana and Paola Crippa: to develop an innovative carpet concept, thanks to a peculiar approach, extensive research into materials and yarn production techniques and placing particular attention on the relationship with the client. In 2007 Besana Moquette transferred its 'know how' also onto the making of rugs, producing special designs and extending its selection of permanent textiles and wool rugs. This gave rise to the brand Besana Carpet Lab: a real workshop where architects, designers and private clients can experiment and create unusual colour combinations to decorate and design public spaces and private houses. It is precisely in this great chameleonic capacity to respond to every need that Besana's uniqueness lies.

The possibility to create bespoke designs and colour palettes enables anyone to create high-end tailor made carpets, also thanks to an online platform conceived by the Besana team to facilitate the dialogue between users, professionals and workers who weave and inlay by hand. An 'open' configurator accessible to anyone, developed to guarantee products that are completely customisable and of high quality.

Lavorati a mano/Handmade

Siamo orgogliosi di creare tappeti lavorati a mano unici. Ogni prodotto è creato con maestria dai nostri artigiani e le piccole imperfezioni li rendono irripetibili.
/We pride ourself of making one-of-a-kind handcrafted rugs. Each product is carefully crafted by our artisans and every imperfection is what makes them unique.
